

# Guide for Acoustic Identification of Florida bats

---

## Family:

Vespertilionidae

## Database species code

Lascin or Laci

See glossary for explanation of codes

## Scientific name

*Lasiurus cinereus* (Palisot de Beauvois, 1796)

Taxonomy follows Simmons and Cirranello (2021)

## Call shape

To view call graphics click on the camera icon on the right. You can then move through all images by using the left or right arrow keys. A left mouse click returns to the fact sheet.

Typical North American Vespertilionid pulses with FM reversed J broadband pulses of short duration. However, distinctive for the genus *Lasiurus* the Fmin shifts up and down. Note that commute calls are longer duration, have a lower frequency and are narrow band.

## Vocal signature parameters

Parameters	N	Min	Max	Mean	St.Dev	10%	25%	75%	90%
Dur	556	0.36	20.79	10.02	4.01	3.79	8.16	12.62	14.70

## Source of acoustic data

Chris Corben

## Known counties of distribution

- Alachua
- Baker
- Bay
- Bradford
- Calhoun
- Citrus
- Clay
- Columbia
- Dixie
- Duval
- Escambia
- Flagler
- Franklin
- Gadsden
- Gilchrist
- Gulf
- Hamilton
- Hernando
- Holmes
- Jackson
- Jefferson
- Lafayette
- Lake
- Leon
- Levy
- Liberty
- Madison
- Marion
- Nassau
- Okaloosa
- Pasco
- Putnam
- Santa Rosa
- St. Johns
- Sumter
- Suwannee
- Taylor
- Union
- Volusia
- Wakulla
- Walton
- Washington

## Conservation status

Least concern; Ver.3.1. Population trend - unknown; evaluated 2016. (I.U.C.N. 2017.)

## Notes

Baird et al. (2015) appeared to make a strong case of separating the genus *Lasiurus* into 3 genera; proposing that the genus name *Lasiurus* be restricted to red bats, *Dasypterus* be used as the genus name for yellow bats, and hoary bats plus *L. egregius* (which appears more closely related to hoary bats than to red bats) be reassigned to the genus *Aeoreastes*.

However, Ziegler et al. (2016) stated "That there was insufficient justification for changing the well-established zoological nomenclature for these bats, and any potential value of applying different generic names to the three clades is far outweighed by the confusion that these name changes will cause." Therefore, the classical nomenclature for the genus is maintained in these Fact Sheets and carried over to the Interactive ID keys to the vocal signatures of the Lasiurines.
