

# Chaetanaphothrips signipennis

## Distinguishing features

Female macroptera. Body yellow, fore wings pale with brown cross-bands at base and medially; antennal segments V–VI with apex brown. Antennae 8-segmented, VII–VIII slender, III–IV with sense cone forked and slender. Head wider than long; usually 3 pairs of ocellar setae present but pair I sometimes not developed, pair III between anterior margins of hind ocelli. Pronotum with 1 pair of major posteroangular setae; 2 pairs of posteromarginal setae; prosternal basantra with 2 pairs of discal setae. Metanotum weakly reticulate, median setae small and placed well behind anterior margin. Fore wing slender, first vein with 3 setae on distal half, second vein with 3–4 setae. Tergites without sculpture medially, posterior margins with complete craspedum; VIII with sculptured area extending anteromesad from spiracle. Sternites with large lobed craspedum, except medially on VII; median setae on VII arise in front of posterior margin; sternite III with small transverse pore plate. Male macroptera. Similar to female; tergite IX with pair of very stout thorn-like setae and posterior to these several small tubercles; sternites III–VII with transverse pore plate.

## Related species

*Chaetanaphothrips* currently comprises 20 species, most with restricted distributions in SE Asia (Nonaka & Okajima, 1992). Three species are widespread in tropical countries, the other two being *C. leeuwenii* and *C. orchidii*, but in neither of these do females have a transverse pore plate on sternite III.

## Biological data

Breeding on leaves of orchids [Orchidaceae] and *Musa* sp. [Musaceae], on which plants it is sometimes a pest.

## Distribution data

Widespread in tropical countries and recorded in Australia from Northern Territory, Queensland, and New South Wales.

## Family name

THRIPIDAE - THRIPINAE

## Species name

*Chaetanaphothrips signipennis* (Bagnall)

## Original name and synonyms

*Scirtothrips signipennis* Bagnall, 1914: 22

*Euthrips biguttaticorpus* Girault, 1924: 1

*Euthrips musae* Tryon in Girault, 1925: 471

*Physothrips citricorpus* Girault, 1927: 1.
