

Caladenia integra

Name and Authority

Caladenia integra E.Coleman

Synonyms (previous names)

Arachnorchis integra; Phlebochilus integra

Common Name

Smooth-lipped Spider Orchid

Complex Name

Caladenia falcata (Green Spider Orchids)

Originally Described by

Edith Coleman in Victorian Naturalist 49:246 (1933)

Distribution and Habitat

Tenterden to Clackline, growing in sandy-clay soil on and around granite outcrops and more rarely in associated woodlands.

Flowering Months

· · · · · Sep Oct Nov ·

Description

A distinctive Wheatbelt [species](#) 200–500 mm high with a hairy leaf 150–250 mm long by 8–12 mm wide and up to two green, yellow and red flowers 60–80 mm across.

Distinguishing Features

It is distinguished from the related Pointing Spider Orchid (*Caladenia exstans*) by its larger flowers, larger [labellum](#) with [calli](#) stopping before the dark purple apex and more westerly distribution.
