

Caladenia winfieldii

Name and Authority

Caladenia winfieldii Hopper & A.P.Br.

Synonyms (previous names)

Arachnorchis winfieldii; Calonemorchis winfieldii

Common Name

Majestic Spider Orchid

Complex Name

Caladenia longicauda (White Spider Orchids)

Originally Described by

Stephen Hopper & Andrew Brown in Nuytsia 14:159,160, Fig.32 (2001)

Distribution and Habitat

South-east of Manjimup, growing in seasonally wet sandy-clay and clay soils in forests and woodlands. Despite extensive searches the [species](#) is known from just two locations a few hundred metres apart.

Flowering Months

· · · · · Oct Nov ·

Description

A rare [species](#) 300–600 mm high with a hairy leaf 100–250 mm long by 6–10 mm wide and up to two deep pink flowers 60–100 mm across.

Distinguishing Features

It is distinguished from the related Pink Spider Orchid (*Caladenia harringtoniae*) by its larger, deeper pink flowers and wholly pale to dark pink [labellum](#).

WA Conservation Code (Threatened Status)
