

Caladenia x resupina

Name and Authority

Caladenia x resupina Hopper & A.P. Br.

Synonyms (previous names)

Jonesiopsis × resupina

Common Name

Bent Spider Orchid

Originally Described by

Stephen Hopper & Andrew Brown in Nuytsia 14(1/2): 299, Figs 75, 77 (2001)

Distribution and Habitat

Ongerup to Ravensthorpe, growing in sandy-clay soil in open woodlands.

Flowering Months

· · · · · Sep Oct · ·

Description

An unusual **hybrid** 200–300 mm high with a dull green, prominently hairy leaf 60–150 mm long by 4–7 mm wide and up to two red and white flowers 40–60 mm across.

WA Conservation Code (Threatened Status)

Not Listed

Notes

A distinctive hybrid between Lazy Spider Orchid (*Caladenia multiclavia*) and Cream Spider Orchid (*C. horistes*). Hybrids between *C. multiclavia* and other members of the *Caladenia filamentosa* complex are similar in appearance to *C. x resupina* and are easily mistaken for that taxon.
