

Didymoplexis

Name and Authority

Didymoplexis Griff.

Common Name

Crystal Orchids

Originally Described by

William Griffith in Calcutta J.Nat.Hist. 4:383, Tab. 17 (1844)

Flowering Months

Jan Feb Mar

Description

Didymoplexis are leafless, non-green and **saprophytic**. The flowers are short-lived and once pollinated, the flower stalk extends the flesh-pink coloured seed **capsule** to facilitate seed dispersal.
