

Diuris brumalis

Name and Authority

Diuris brumalis D.L.Jones

Common Name

Winter Donkey Orchid

Complex Name

Diuris corymbosa (Donkey Orchids)

Originally Described by

David Jones in Austral.Orchid Res. 2:53 (1991)

Distribution and Habitat

Gillingarra to Dwellingup, growing in lateritic and granitic soils in forests and woodlands.

Flowering Months

· · · · · Jun Jul Aug · · · · ·

Description

A common early flowering [species](#) 200–500 mm high with two to three smooth leaves 140–200 mm long by 8–10 mm wide and up to 15 yellow and brown flowers 20–30 mm across.

Distinguishing Features

It is distinguished from the related South Coast Donkey Orchid (*Diuris brockmanii*) by its taller stature, more numerous, larger flowers and more northerly distribution. From the similar Common Donkey Orchid (*D. corymbosa*) it is distinguished by its earlier flowering period.
