

Diuris conspicillata

Name and Authority

Diuris conspicillata D.L.Jones

Common Name

Spectacled Donkey Orchid

Complex Name

Diuris corymbosa (Donkey Orchids)

Originally Described by

David Jones in Austral.Orchid Res. 2:54-55 (1991)

Distribution and Habitat

Esperance, growing in shallow soil pockets on coastal granite outcrops.

Flowering Months

· · · · · Aug Sep · · ·

Description

A rare, geographically restricted [species](#) 150–350 mm high with two to three smooth leaves 100–200 mm long by 5–10 mm wide and up to six yellow and brown flowers 20–35 mm across.

Distinguishing Features

It is distinguished from the related Common Orchid (*Diuris corymbosa*) by the prominent dark red-brown blotches at the base of the [labellum lateral](#) lobes and its more easterly distribution on coastal granite outcrops near Esperance.
