

# Diuris sp. 'Augusta'

## Name and Authority

**Diuris sp. 'Augusta'**

## Common Name

Augusta Bee Orchid

## Complex Name

Diuris laxiflora (Bee Orchids)

## Originally Described by

Undescribed

## Distribution and Habitat

Augusta, growing in sandy-clay and clay soils in seasonally wet flats, flowering best in the season following summer fire.

## Flowering Months

. . . . . Oct Nov Dec

## Description

A geographically restricted [species](#) 250–400 mm high with four to six smooth leaves 60–150 mm long by 1.5–2 mm wide and up to five yellow, brown marked flowers 18–25 mm across.

## Distinguishing Features

It is distinguished from the related Tall Bee Orchid (*Diuris carinata*) by its more south-westerly distribution, slightly smaller flowers and generally later flowering period.

## WA Conservation Code (Threatened Status)
