

# Diuris sp. 'Toolinna'

## Name and Authority

*Diuris* sp. 'Toolinna'

## Common Name

Cliffs Donkey Orchid

## Complex Name

*Diuris* corymbosa (Donkey Orchids)

## Originally Described by

Undescribed

## Distribution and Habitat

Toolinna Cove, growing in shallow soil pockets on the tops of coastal limestone cliffs.

## Flowering Months

· · · · · Jul Aug · · · · ·

## Description

A coastal species 100–300 mm high with two to three smooth leaves 80–150 mm long by 4–6 mm wide and up to five colourful golden-yellow and reddish-brown flowers 15–25 mm across.

## Distinguishing Features

It is related to Beautiful Donkey Orchid (*Diuris pulchella*) but has reddish-brown rather than mauve marked flowers, a more prominent labellum midlobe and a much more easterly distribution. It is also possibly related to Green Range Donkey Orchid (*D. littoralis*) with which it sometimes grows but has smaller flowers and a shorter, broader labellum midlobe.
