

Drakaea concolor

Name and Authority

Drakaea concolor Hopper & A.P.Br.

Common Name

Kneeling Hammer Orchid

Originally Described by

Stephen Hopper & Andrew Brown in Austral.Syst.Bot. 20:262-264 (2007)

Distribution and Habitat

Coorow to Kalbarri, growing in pale yellow sandy soils in shrublands.

Flowering Months

· · · · · Aug Sep · · ·

Description

A northern [species](#) 150–250 mm high with a smooth heart-shaped, ground-hugging leaf 12–20 mm long by 10–18 mm wide and a single dull greenish-yellow and purplish-red flower 3–5 mm across.

Distinguishing Features

It is distinguished from the related Glossy-leaved Hammer Orchid (*Drakaea elastica*) by its scarcely glossy, dark green leaf, more evenly coloured [labellum](#) with a narrower head-like top and more northerly distribution.

WA Conservation Code (Threatened Status)

Threatened (Endangered)
