

Leporella

Name and Authority

Leporella A.S.George

Common Name

Hare Orchids

Originally Described by

Alexander George in Nuytsia 1:183 (1971)

Flowering Months

· · Mar Apr May Jun · · · · ·

Description

Leporella has one or two smooth green, red-striped leaves, a smooth flower stem and up to four green and purple flowers with a short, broad [dorsal sepal](#), narrow, erect, ear-like [petals](#), narrow, hanging [lateral sepals](#) and a broad, prominently fringed [labellum](#). The leaves are often immature when plants are in early flower, expanding to their full size as the flowers mature
