

Microtis alboviridis

Name and Authority

Microtis alboviridis R.J.Bates

Synonyms (previous names)

Microtis aff. alba; Microtis sp. 'green'

Common Name

Scented Mignonette Orchid

Complex Name

Microtis media (Common Mignonette Orchids)

Originally Described by

Robert John Bates in Orchadian 16(2):70-72,74, Fig.1 (2008)

Distribution and Habitat

Dandaragan to Condingup, growing in sandy, sandy-clay and lateritic soils in forests, woodlands and seasonally wet flats. The [species](#) rarely flowers in unburnt bushland but is common in the season following a summer fire.

Flowering Months

. Oct Nov Dec

Description

A forest [species](#) 100–300 mm high with a smooth tubular leaf 150–250 mm long by 3–6 mm wide and up to 40 greenish-white to greenish-yellow flowers 2–3 mm across.

Distinguishing Features

It is distinguished from the related White Mignonette Orchid (*Microtis alba*) by its smaller, greenish-white to greenish-yellow flowers and generally less prominently bi-lobed [labellum](#).
