

Praecoxanthus

Name and Authority

Praecoxanthus Hopper & A.P.Br.

Common Name

Leafless Orchids

Originally Described by

Stephen Hopper & Andrew Brown in Lindleyana 15:124 (2000)

Flowering Months

· · Mar Apr May · · · · ·

Description

Praecoxanthus has a smooth flower stem and a single creamy-white flower with broad, spreading **petals** and **sepals** and a green, yellow and red **labellum** with golden headed **lamina calli**. Non-flowering plants have a broad, smooth, prominently striped, ground hugging leaf while flowering plants have a leaf that is reduced to a minute **bract** at the base of the flowering stem.
