

# Pterostylis arbuscula

## Name and Authority

**Pterostylis arbuscula** (D.L.Jones & C.J.French) D.L.Jones & C.J.French

## Synonyms (previous names)

Pterostylis aff. sanguinea; Pterostylis sp. 'Eyre' ; Urochilus arbusculus

## Common Name

Varicoloured Banded Greenhood

## Complex Name

Pterostylis vittata (Banded Greenhoods)

## Originally Described by

David Jones & Christopher French in Australian Orchid Review 82(5): 44-46, Fig. 2 (2017) as Urochilus arbusculus

## Distribution and Habitat

East of Northampton to east of Madura, growing in sand and sandy-clay soil in woodlands and shrublands. Also found in South Australia.

## Flowering Months

..... Jun Jul .....

## Description

A short statured species 100–150 mm high with six to nine cauline leaves 30–50 mm long by 5–8 mm wide and up to five semi translucent, green and white or reddish-brown and white flowers 8–12 mm across. The species previously known as Varicoloured Banded Greenhood (Pterostylis sp. 'Eyre') is now considered a form of this species.

## Distinguishing Features

Pterostylis arbuscula is differentiated from P. sanguinea by its more inland distribution, generally shorter height and fewer, generally smaller flowers.
