

## Pterostylis gracillima

### Name and Authority

**Pterostylis gracillima** (D.L.Jones & C.J.French) D.L.Jones & C.J.French

*Pterostylis gracillima*

### Synonyms (previous names)

Pterostylis sp. 'long sepals'; *Diplodium gracillimum*

### Common Name

Long Sepaled Snail Orchid

*Pterostylis gracillima* distribution

### Complex Name

*Pterostylis nana* (Snail Orchids)

*Pterostylis gracillima*

### Originally Described by

David Jones & Christopher French in Australian Orchid Review 84(1): 24-26, Fig. 2 (2019) as  
*Diplodium gracillimum*

### Distribution and Habitat

Mt Lindesay to Northcliffe, growing in shallow soil pockets on granite outcrops.

### Flowering Months

..... Aug Sep Oct ..

### Description

A narrow *species* 70–250 mm high with five to 10 leaves forming a ground-hugging or ascending *basal rosette* 10–30 mm across, three to four *cauline* leaves and one (rarely two) translucent, green and white flowers 4–5 mm across.

### Distinguishing Features

Apart from *habitat* (granite outcrops vs swamps) there is little difference between this *species* and Small *Rosette* Snail Orchid (*Pterostylis microphylla*) and they may represent forms of the same *species*.
