

## Pterostylis leptochila

### Name and Authority

**Pterostylis leptochila** M.A.Clem. & D.L.Jones

### Synonyms (previous names)

Oligochaetochilus leptochilus

### Common Name

Ravensthorpe Rufous Greenhood

### Complex Name

Pterostylis rufa (Rufus Greenhoods)

### Originally Described by

Mark Clements & David Jones in Austral.Orchid Res. 1:123 (1989)

*Pterostylis leptochila*

*Pterostylis leptochila* distribution

### Distribution and Habitat

Ongerup to Munglinup, growing in sandy-clay and clay soils in woodlands and shrublands.

*Pterostylis leptochila*

### Flowering Months

· · · · · Sep Oct Nov ·

*Pterostylis leptochila*

### Description

A geographically restricted species 100–250 mm high with seven to 12 leaves forming a ground-hugging basal rosette 40–55 mm across and up to five translucent, olive-green and white or brown and white flowers 9–11 mm across.

*Pterostylis leptochila*

### Distinguishing Features

It is distinguished from Painted Rufous Greenhood (*Pterostylis picta*) by its larger, broader lateral sepals which have a more cupped appearance and smaller, less fleshy labellum.

### WA Conservation Code (Threatened Status)

Not Listed

*Pterostylis leptochila*
