

Pterostylis sinuata

Name and Authority

Pterostylis sinuata (D.L.Jones) Janes & Duretto

Pterostylis sinuata

Synonyms (previous names)

Pterostylis sp. 'Northampton'; Pterostylis aff. cycnocephala; Hymenochilus sinuatus

Common Name

Northampton Midget Greenhood

Pterostylis sinuata distribution

Complex Name

Pterostylis mutica (Midget Greenhoods)

Pterostylis sinuata

Originally Described by

David Jones in The Orchadian 16(4): 180-182, Fig. 3 (2009) as *Hymenochilus sinuatus*

Distribution and Habitat

Northampton to Port Gregory, growing in sandy-clay and clay soils in seasonally wet depressions and seepage areas. The *species* is often found in open situations in otherwise dense shrubland.

Pterostylis sinuata

Flowering Months

..... Jul Aug

Pterostylis sinuata

Description

A geographically restricted *species* 50–120 mm high with five to 10 leaves forming a ground-hugging **basal rosette** 30–40 mm across, two to three **cauline** leaves and up to 20 small, greenish-yellow flowers 5–6 mm across.

Distinguishing Features

It is distinguished from the related Midget Greenhood (*Pterostylis mutica*) by its lighter green flowers, wavy margined *rosette* leaves and north-westerly distribution.

Pterostylis sinuata

WA Conservation Code (Threatened Status)

Threatened (Critically Endangered)
