

# Pterostylis sp. 'Cocklebidy'

## Name and Authority

**Pterostylis sp. 'Cocklebidy'**

## Common Name

Nullabor Rufous Greenhood

## Complex Name

Pterostylis rufa (Rufous Greenhoods)

## Originally Described by

Undescribed

## Distribution and Habitat

East of Cocklebidy, growing in sandy-clay soil in open shrublands. Just one population is currently known.

## Flowering Months

· · · · · Sep Oct · ·

## Description

An eastern [species](#) 100–180 mm high with six to 10 leaves forming a ground-hugging [basal rosette](#) 30–50 mm across and up to seven translucent, pale brown and white flowers 10–12 mm across.

## Distinguishing Features

It is distinguished from the related Spoon-lipped Rufous Greenhood (*Pterostylis spathulata*) by its more upright flowers, straight or up curved [dorsal sepal](#), less prominently falcate [lateral sepals](#) and easterly distribution.
