

Pterostylis sp. 'northern'

Name and Authority

Pterostylis sp. 'northern'

Common Name

Northern Banded Greenhood

Complex Name

Pterostylis vittata (Banded Greenhoods)

Originally Described by

Undescribed

Distribution and Habitat

Mogumber to Kalbarri, growing in sandy and lateritic soils in woodlands and shrublands, often on the tops and slopes of rocky hills.

Flowering Months

· · · · May Jun Jul · · · · ·

Description

A northern **species** 100–250 mm high with seven to 10 **cauline** leaves 30–40 mm long by 4–6 mm wide and up to seven semi translucent, green and white or fawn and white flowers 7–9 mm across.

Distinguishing Features

It is distinguished from the related Banded Greenhood (*Pterostylis vittata*) by its shorter stature, fewer, more variably coloured flowers and northerly range of distribution.
