

# Thelymitra uliginosa

## Name and Authority

**Thelymitra uliginosa** Jeanes

## Common Name

Southern Curly Locks

## Complex Name

Thelymitra spiralis/spiralis (Lobed Sun Orchids)

## Originally Described by

Jeffrey Jeanes in Muelleria 27:159-160, Figs. 4, 10g-i (2009)

## Distribution and Habitat

Yallingup to Condingup with disjunct populations south east of Armadale, growing in seasonally damp areas surrounding peaty swamps and granite outcrops.

## Flowering Months

· · · · · Aug Sep · · ·

## Description

A mainly lower southwestern [species](#) 100–300 mm high with a narrow, smooth leaf 50–90 mm long by 3–8 mm wide at its wide st point and up to two (rarely three) deep blue-mauve, striped flowers 20–25 mm across.

## Distinguishing Features

It is distinguished from other members of the Thelymitra spiralis [complex](#) by its smaller, deeper blue-mauve, self-pollinating flowers.
